

SynDaver Mortuary Model

101300

The SynDaver Mortuary Model includes many features from our line of synthetic humans with modifications to fit the needs of the field. We are aggressively pursuing means to reduce overall costs for the end-user by focusing our efforts on the aspects most relevant to training in the mortuary science field.

The SynDaver Synthetic Human is world famous for accurately reproducing detailed human anatomy with highly realistic materials. Individual tissues of construction have been developed over the course of the last two decades to accurately mimic the look and feel of real human tissue.
