CopyCat®

The Syndaver CopyCat® is a Hybrid, full body replica of the feline anatomy with synthetic muscles, tendons and bones.

It pairs SynTissue® organs with a silicone chassis and is intended to replace the use of cat cadavers in middle and high school dissection (non-biohazard and ethically sound). Its replaceable SynTissue® organs extend the useful life of this model indefinitely.

Relevant Skills

Dissection, retraction, identification of internal and external anatomy.

Included Components

One silicone feline chassis containing silicone vasculature, heart, lungs, and trachea. One SynTissue abdominal pouch containing SynTissue kidneys, GI Tract, reproductive system, spleen, liver and diaphragm,
