

## SynAtomy Basic Suturing Kit

160300

Our SynAtomy basic suturing kit is both an incredible value and a great training platform for students seeking to learn the skills associated with cutting and suturing procedures.

This complete kit includes a great instruction manual, basic suturing tools, industry-best SynTissue synthetic human tissues, and a durable travel case.

**Relevant Skills:** Placement and removal of sutures and staples, anastomosis, laceration repair, cannulation and application of adhesives.

**Equipment Compatibility:** Laser scalpels, electrocautery and RF ablation devices, harmonic blades, monopolar and bipolar devices, plasma knives, ultrasound equipment and all known imaging equipment.

**Included Tools:** Storage case, instruction manual (Suture and Surgical Hemostasis, by Rebecca Pieknick), student-grade tools (hemostats, scissors, and tweezers), scalpel with 3 blades and 3 assorted sutures.

**Included Tissues:** Complete student tissue pack, with suture pad, knot tying pad, double-layered bowel and two anastomosis vessels.

**Available Options:** If you require custom pathologies, tissues, tools or other changes please call and ask to speak to one of our technical sales representatives.

**Dimensions:** Storage case is 8" x 6" x 4" (L x W x D). Color may vary.

**Extraordinary Features:** SynTissue synthetic human tissues made from salt, water and fiber - which feature the world's most realistic tactility.

SynTissue synthetic human tissues match the acoustical characteristic of real human tissue.

All of our products are made in the USA.
